

Johnathan Webster

Jonathan Webster is from Louisville, Ky. He attends Rose-Hulman Institute of Technology and is majoring in Mathematics and Computer Engineering. He will be a senior this year and is planning on attending graduate school for Mathematics.

Jeni Wait

Jeni Wait is currently pursuing an MS degree in Structural Mechanics at the University of Southern California. Her research is conducted under the guidance of Dr. Sami F. Masri and Dr. Robert L. Nigbor at the USC Civil Engineering Dynamics Laboratory. Recent projects include a full-scale modal test of an in-situ structure located in Claremont, CA, and fragility testing of non-structural elements in hospitals. In the fall semester, she plans to continue her with her research in experimental dynamics at USC. Prior to entering graduate school, Jeni completed her undergraduate degrees in 1999 at Harvey Mudd College (BS Independent Program of Study (Structural Engineering Systems)) and Scripps College (BA Humanities and Social Sciences).

Benjamin Arcand

I grew up north of Detroit, Michigan and moved to Houghton Michigan to attend college. Currently I'm completing a Mechanical Engineering degree at Michigan Tech and plan to continue for a masters degree. This summer while working for the lab I'm doing all the rock climbing hiking and camping I can stand before heading back to the midwest.
