

Andrew Jahola

I hail from the sparsely populated region known as Northwest Minnesota. Some call it north of Minneapolis, others call it Canada. I called it home. I was raised on a small farm where my dad cultivated small grains and I helped him however I could, even though I was a small boy. He even let me drive the tractor once. I attended Hallock elementary school, where in the fifth grade I was bestowed the honor of traffic guard. I eventually found my way to the

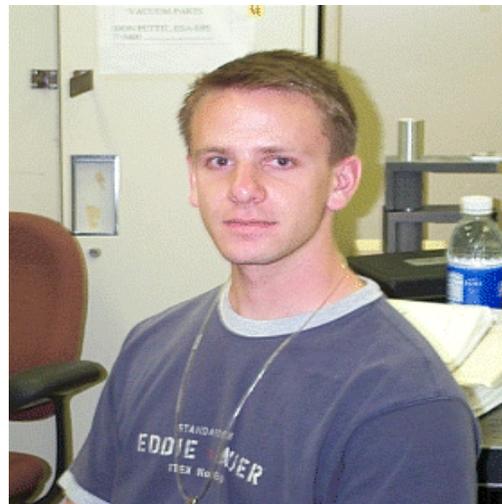

Kittson Central High School and after four years, left. Some Lego book convinced me to travel a thousand miles from home to attend one of the finest engineering schools that Indiana could offer: Rose-Hulman Institute of Technology. I am entering my senior year in the Mechanical Engineering department and plan to graduate. To pass the summers, I worked for the Kittson County Highway Department repairing and replacing road signs. Would you believe this is my first engineering internship? For fun, I often go camping, canoeing, fishing, swimming, and play video games. I just returned from my second trip to the Boundary Waters Canoe Area, an excellent place to spend a week away from civilization.

Derek Reding

My pursuit of truth in the universe has led me to a path in Mechanical Engineering where I am about to enter my senior year at Colorado State University. I have been a research assistant at the CSU Engines and Energy Conversion Laboratory. Although I have not found much truth there, I do enjoy the research atmosphere and learning there.

I was born in Portland Oregon, but I call Fort Collins, Colorado home. I

enjoy hiking, camping, mountain biking, model airplane building, pottery, making tobacco pipes, and practicing martial arts.

Edward Kinzel

Hi. My name is Ed Kinzel. I am beginning my senior year in Mechanical Engineering at Purdue University. I am from Bremen, Ohio. I hope to attend graduate school and focus on machine design and kinematics. I am enjoying the Dynamics Summer School and the region around Los Alamos. My hobbies include hiking, woodworking, and rugby.
