

**Don Wang**

Don Wang is a grad student pursuing a Master's degree in Electrical Engineering: Systems at the University of Michigan, Ann Arbor. He originally started at Cal Poly, San Luis Obispo (good weather) in Fall 2000 and transferred to Michigan (great weather) in Fall 2002. His major area in Systems is Communications. Although he has lived near coastlines his entire life (he is from the Bay Area in Northern California), he detests going to the beach because of the sand and brine. His main hobbies include bowling, eating, reading, and skiing.

**John McFarland**

John McFarland graduated from Vanderbilt University with a B.E. in Mechanical Engineering, a second major in math, and a minor in economics. He is planning on staying at Vanderbilt to pursue a Master's degree in Reliability and Risk Engineering. John grew up in Austin, Texas where he enjoyed playing baseball and water-skiing. He now spends his free time playing guitar and lifting weights.

**Tracy Van Zandt**

Tracy started college as a culinary arts student, but then decided to make a slight change in her career path and pursue a mechanical engineering degree. She graduated in June, 2004 from the University of Massachusetts at Lowell as the top student in the College of Engineering. She will continue this fall at UMass Lowell to obtain her master's degree in modal analysis. In Tracy's small amounts of free time, she reads just about any book she can get her hands on, spends time with her fiancé, attempts to play with her two irritable cats, and even occasionally cooks.
