

Damage Assessment Through Control Feedback Expansion of Modal Space (Mentor: John Schultze)

**Adam Cardi**

My name is Adam Cardi, and I am from Cincinnati Ohio. I just graduated from Purdue University with a B.S. in Mechanical Engineering this past May. My undergraduate research project at school was primarily concerned with load identification in body armor. In my free time I love to kayak, bike and swim. Next fall I will be in the direct to PhD program at Georgia Tech's school of Mechanical Engineering.

**Ben Kosbab**

Ben Kosbab will enter the 2005-06 school year as a senior in civil engineering at Rice University, specializing in structural engineering. He is the Marshal and Associate Editor of Chi Epsilon as well as the secretary of ASCE in the local chapters. He spent most of his younger years in the Detroit metro area, and therefore has particular interest in automobiles. As such, he is heavily involved with the Rice chapter SAE, helping to start a tradition of racing in the One Lap of America races. He likes hands-on activities, rowing, reading, and exercise. He plans on attending graduate school before heading off to work in the structural industry.

**Tim Overly**

Born and raised in the mountainous high altitude region of Nepal, Timothy Gilbert Overly gained his enormous strength and resistance to pain while a member of the elite ranks of the Mt. Everest Sherpas. Later in life, after winning an international heavyweight boxing title, Tim decided to pursue a degree in Mechanical Engineering at the University of Cincinnati. He is currently working on his masters in the area of structural dynamics. He has such diverse interests as knitting, Frisbee golf, alligator wrestling, and glass blowing. Everyday he applies the intensity and ferocity learned in the ring on everyday problems that face us all!
