

Model Validation of Loose Bolted Joints in Damaged Structural Systems (Mentor: Alan Barhorst)

Brandon Dierschke

Howdy! My name is Brandon Dierschke and I am a senior at Texas A&M University. I am currently working on a B.S. in Mechanical Engineering and minors in Business and Mathematics. I am originally from the small farming community of Rowena in West Central Texas. I plan to graduate in December of 2007 and then begin graduate school in the fall of 2008. I enjoy reading, playing golf, and spending time with friends.

Joel Feenstra

Joel Feenstra has recently graduated from Michigan Technological University with a B.S. in Mechanical Engineering. He is planning to return to MTU to pursue his Masters in Mechanical Engineering with a focus on controls and robotics, and will be running the laboratory sections for the “Introduction to Robotics and Mechatronics” class. In his spare time he enjoys downhill skiing, golf, swimming, billiards, reading, and hanging out with friends.

Tyler Winter

Tyler Winter is a senior in Aerospace Engineering at the University of Missouri-Rolla. He plans on attending the university for an additional year to complete a Masters in Aerospace Engineering. His primary interests are in Computational Fluid Dynamics, Hypersonics, and Astrodynamics. He enjoys reading, playing golf, and spending time with his girlfriend.
